C. RESEARCH AND SCHOLARLY ACTIVITIES

1. Academic & Professional Publications

[**Bold numbers**] indicates publications after joining UMass Lowell; Students/Postdoctoral Students supervised by Dr. Budhlall are shown *in italics and underlined*; * indicates that Dr. Budhlall is the corresponding author of the paper; **IF**[§] indicates the impact factor of the journal (as of year 2011, the latest available); Citation numbers are from the ISI Citation Report.

As of January 27th 2014, the total citations for all of Dr. Budhlall's publications are **246 times**, and her *h-index*[†] is **11**.

§IF: impact factor, is a measure reflecting the average number of citations to articles published in science and social science journals. Normally, old publications are cited more, and it takes a few years for new publications to accumulate citations.

†h index, a scholar with an index of *h* has published *h* papers each of which has been cited in other papers at least *h* times. The index is designed to improve upon simpler measures such as the total number of citations or publications, and serves as a more accurate measure of the productivity and impact of the published work of a scientist or scholar.

* In my research field, the graduate student or Postdoc who finishes the project is denoted as the first author, and the PI serves as the corresponding (more often than not last) author. For publications that I am not a corresponding author, it indicates that they are joint publications from collaborative work.
