RED FLAGS, WARNING SIGNS AND INDICATORS

RED FLAGS, WARNING SIGNS AND INDICATORS

By Roger Depue, Ph.D.

Experts who evaluate possible indicators that an individual is at risk of harming himself or others know to seek out many sources for clues, certain red flags that merit attention. A single warning sign by itself usually does not warrant overt action by a threat assessment specialist. It should, however, attract the attention of an assessor who has been sensitized to look for other possible warning signs. If additional warning signs are present then more fact-finding is warranted to determine if there is a likelihood of danger.

Some warning signs carry more weight than others. For instance, a fascination with, and possession of, firearms are more significant than being a loner, because possession of firearms gives one the capacity to carry out an attack. But if a person simply possesses firearms and has no other warning signs, it is unlikely that he represents a significant risk of danger.

When a cluster of indicators is present then the risk becomes more serious. Thus, a person who possesses firearms, is a loner, shows an interest in past shooting situations, writes stories about homicide and suicide, exhibits aberrant behavior, has talked about retribution against others, and has a history of mental illness and refuses counseling would obviously be considered a significant risk of becoming dangerous to himself or others. A school threat assessment team upon learning about such a list of warning signs would be in a position to take immediate action including:

- Talking to the student and developing a treatment plan with conditions for remaining in school
- Calling the parents or other guardians
- Requesting permission to receive medical and educational records
- Checking with law enforcement to ascertain whether there have been any interactions with police
- Talking with roommates and faculty
- Suspending the student until the student has been treated and doctors indicate the student is not a safety risk

Following are some warning signs (indicators and red flags) associated with school shootings in the United States. Schools, places of employment, and other entities that are creating a threat assessment capability may want to be aware of these red flags:
