

Resources for 16.480/552 Microprocessor II and Embedded System Design

Table of contents

1 Tutorials.....	2
2 Datasheets.....	2

The following instructions and datasheets are available for your convenience. Please note they may be out of date.

1. Tutorials

- [Using the EMP20 PROM Programmer](#)
- [EPROM skeleton program](#)
- [Creating EPROM program](#)
- [DOS and BIOS interrupts](#)

2. Datasheets

Please double check the components you obtained; actual parts may be different from the following. Be sure to use the correct datasheets.

- [8088 Microprocessor Datasheet](#)
- [8284 Clock Generator Datasheet](#)
- [2816 2K x 8 EEPROM Datasheet](#)
- [IDT72200 256 x 8-bit Parallel SyncFIFO Datasheet](#)
- [AD670 8-bit Analog to Digital Converter Datasheet](#)
- [Advanced Photonix, Inc. PDV-P5003-ND Photoresistor Datasheet](#)
- [15 MHz Crystal Datasheet](#)
