

89.215 FORENSIC GEOLOGY
BOOK REPORT - *EARTH COLORS*

The emphasis of the book report should be on the forensic science that played a role in the crime-solving process. However, you should also include an over view of the story line. The components of your report would be

1. Over view of the story line. What are the main plots. Who are the main characters and how are they related.
2. How was forensic geology used to solve the crime? This should include a discussion of each method used. What was measured. How can one use the measurements. What was concluded.
3. A critique of the story emphasizing the scientific aspects. Did the science fit the story.
