

Discrete Structures I, Problem Set #0  
(due Wednesday, 1/29/25, 11:59 pm)

This is a two-page assignment that serves numerous purposes. Among other things, it's intended to give you a chance to master the process of making a high-quality multi-page PDF. Importantly, it requires you to affirm your understanding of, and your commitment to abide by, the academic integrity rules that govern the course as described in the syllabus.

A. Please write here the extraneous non-mathematical word in the syllabus:

-----

B. Please let me know what third-person pronoun I should use when referring to you:

-----

(I try to avoid third-person singular pronouns in my teaching; I prefer to use people's individual names so I'll remember their respective contributions!)

(more on next page)

C. Please read the next paragraph and sign below to indicate understanding and agreement.

**I have read the syllabus, and agree to adhere to the rules governing homework. I will not post the homework problems to any online database such as Chegg or CourseHero. If I use such sites as an aid to doing the assignments, I will provide the URLs of all documents I consult. I will acknowledge all other resources I use, such as the names of the tutors who assist me, the classmates I work with, or AI assistants such as ChatGPT.**

Signature: \_\_\_\_\_

D. What did you find most surprising in words.pdf?

*Please submit your two-page submission as a single PDF.*
